## IN THE GULF COAST REGION

### INTRODUCTION

Every two years, Workforce Solutions compiles a list of occupations that are now in demand in the Houston-Galveston Gulf Coast region, or ones that will be in the future. Looking at a variety of data, we're able to project which jobs are expected to have the most growth over the next 10 years. This guide introduces you to those occupations, organized by industry.

In addition, you will also find:

- the median hourly wage (based on 2009 industry standards),
- the current number of jobs in our region and the number of anticipated jobs in 2018, and
- the employment growth for each occupation as a percentage.

Criteria used to identify these occupations are:

- Projected employment for 2018 equal to or greater than the average for all occupations in the region.
- Projected growth rate equal to or greater than the average of all occupations in the region.
- Minimum education requirements of a postsecondary degree or certificate, long-term on-the-job training or work experience in a related occupation.
- Median hourly wages equal to or greater than the median for all occupations in the region.

There are also indicators of which occupations are supported by Workforce Solutions' scholarships.

This guide is a great first step for students setting out on a career path and adults looking to make a change. For further details about each occupation, individual profiles, called "Focus On" guides, are available online at [www.wrksolutions.com](http://www.wrksolutions.com). You'll also find other career planning resources and information about financial aid.

We encourage you to visit one of our career offices and talk with a counselor about your career options. To locate the office nearest you, call **1-888-469-JOBS (5627)**, or find one on our website under Career Office Locations.

For more information on occupations supported by scholarship contact a Workforce Solutions counselor 1-888-469-JOBS (5627).

Scholarship amounts may vary based on need and individual circumstances. For some educational programs requiring a bachelor's degree or higher, Workforce Solutions will only award scholarships to help finance the last two years of the program of study.
