# Gulf Coast Workforce Solutions Index (WSI)

# The Gulf Coast Workforce Solutions Index (WSI)

The WSI is an indicator designed to capture shifts in the local labor market, specifically the balance between available jobs and unemployed workers at a given point in time. Values above 4.0 signal a surplus of jobs while values less than 4.0 signal a surplus of jobseekers. The Gulf Coast Workforce Board monitors the WSI as part of its ongoing review of the region's unemployment insurance work search requirement and reserves the right to adjust the number of weekly job search contacts as labor market conditions warrant. In the event of change to the work search requirement, the Board will notify the Texas Workforce Commission who will in turn notify UI recipients.

WSI Reading June 2022:

6.47

### **Workforce Solutions Index June 2022**

The Houston MSA WSI for June lept to a series high of 6.47, up from March's upwardly revised reading of 5.89, and marking 10 consecutive months with a reading at or above 4.0. June's record index was the result of an increase of 20,000 job ads over May and a relatively modest decrease in unemployed workers by 4,000. This June's reading reaffirms the strength of Houston's labor market and continues to suggest that a minimum requirement of five work search activities per week could be appropriate for unemployed individuals receiving UI benefits.
