

## GET A GOOD GRIP ON A HANDS-ON CAREER ...

Would you like a job where you can work with your hands and challenge your mind?

Do you like working with high-tech tools, as well as with the old reliable ones – pliers, wrenches and screwdrivers? If so, you might be a perfect fit for a career as an HVAC mechanic or installer.

Climate control systems are found in virtually every home and business, especially here in Texas, where the summers are hot and humid.

The demand for qualified HVAC mechanics with advanced skills is on the rise as newer systems become more high-tech. There are many job opportunities working with systems in private homes and in commercial offices, industrial complexes, manufacturing plants, restaurants, hotels, and more.

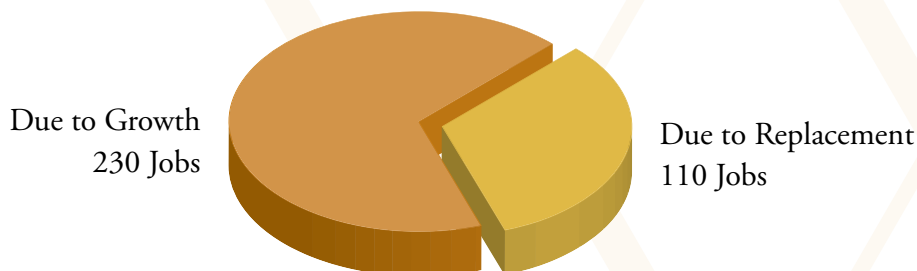

Qualified heating, air conditioning, and refrigeration mechanics and installers (HVAC mechanics and installers) are in short supply everywhere, especially here in the Gulf Coast region. This shortage translates into outstanding career opportunities for individuals who are just entering the workforce.

### Factors contributing to the shortage:

- The population is growing and new buildings need HVAC systems
- Commercial and residential building owners want to increase efficiency of their existing HVAC systems because of rising energy costs
- Many HVAC mechanics and installers are approaching retirement age
- Not enough young people are encouraged to seek out technical training in the field

## CONSERVATIVE ESTIMATES SHOW THAT THE REGION NEEDS OVER 300 MORE HVAC MECHANICS AND INSTALLERS EVERY YEAR.

Annual Job Openings – Gulf Coast Region

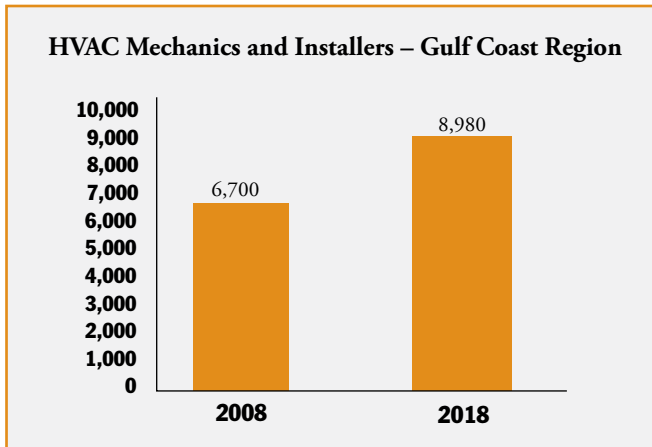

Brought to you by the Education Committee of The Gulf Coast Workforce Board.

## HVAC Mechanic and Installer Jobs – Gulf Coast Region 2018

### WHAT KIND OF HVAC MECHANIC AND INSTALLER CAREERS ARE THERE?

- Residential construction, maintenance, and repair
- Commercial construction, maintenance, and repair
- Industrial construction, maintenance, and repair

### HOW DO YOU BECOME AN HVAC MECHANIC AND INSTALLER?

HVAC mechanics and installers work both indoors and outdoors. They can be found at construction sites, in homes, and in businesses or factories. The work may be strenuous at times and some people may have to travel to job sites. HVAC mechanics and installers are required to obtain a certification from the Environmental Protection Agency ([www.epa.gov](http://www.epa.gov)), and register with the Texas Department of Licensing and Regulation ([www.license.state.tx.us](http://www.license.state.tx.us)). In the Gulf Coast Region, there are two options for HVAC mechanic and installer training: (1) Training programs at community colleges; and (2) Training programs at vocational-technical institutes.
